

Core topic networks before (top) and after (bottom) VR, within response; each row uses the topics extracted from its own timepoint's descriptors
node size and colour = PageRank (same scale in all panels); arrows = observed transitions between consecutive descriptors (thicker = more often); most central topic in the middle

VR Art - pre (15 participants, 28 transitions)

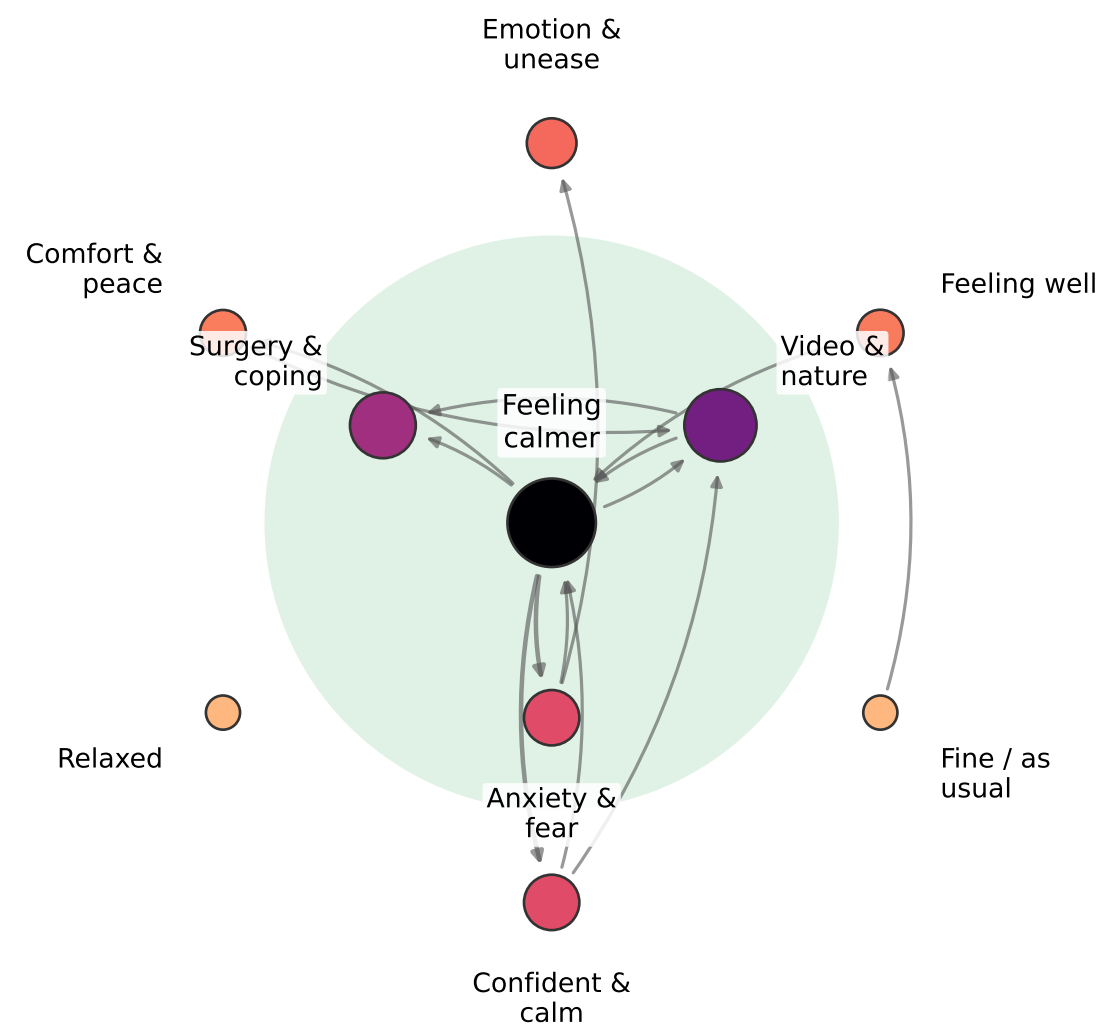

VR Only - pre (17 participants, 19 transitions)

Control - pre (15 participants, 23 transitions)

VR Art - post (16 participants, 16 transitions)

VR Only - post (16 participants, 15 transitions)

Control - post (16 participants, 16 transitions)
