

Core topic networks before (top) and after (bottom) VR, within response
node size and colour = PageRank (same scale in all panels); arrows = observed transitions between consecutive descriptors (thicker = more often); most central topic in the middle

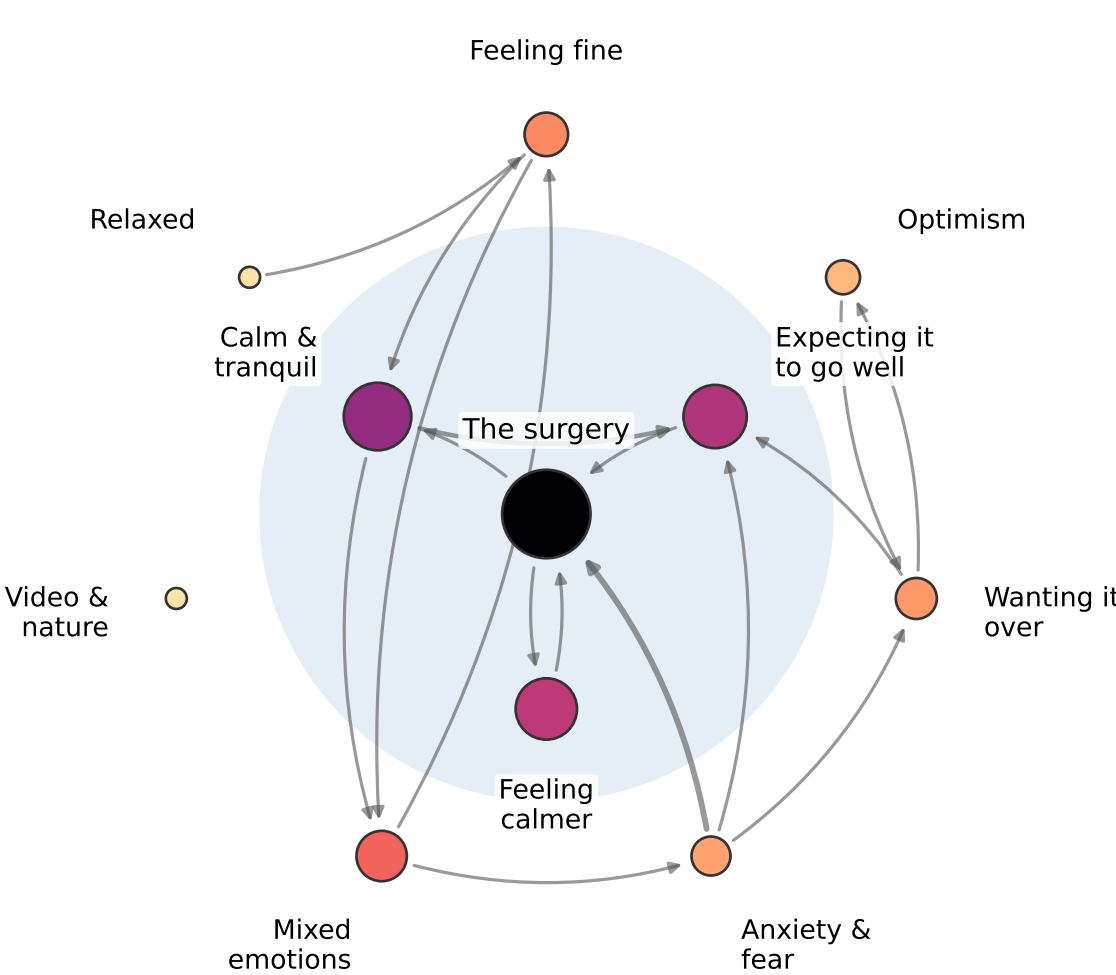

VR Art - pre (17 participants, 23 transitions)

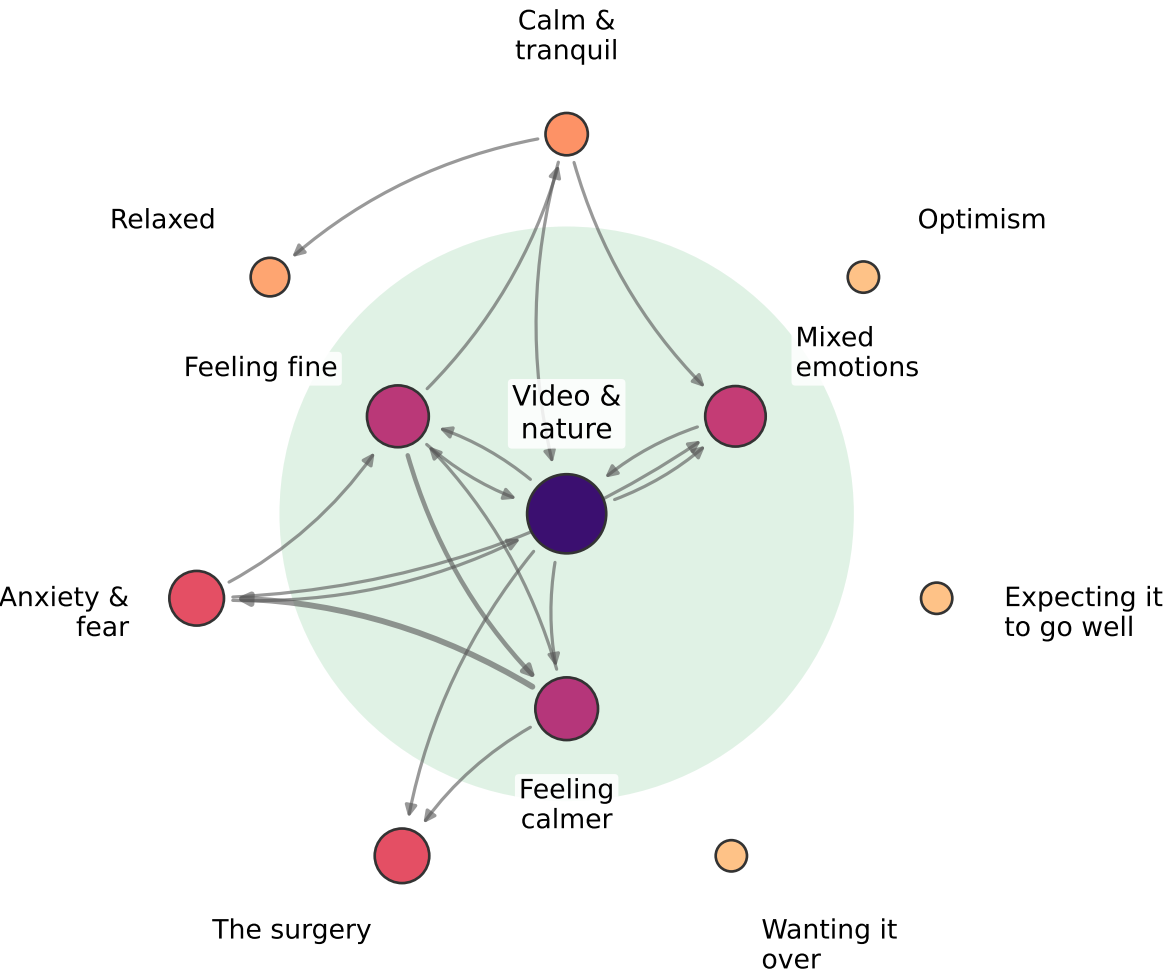

VR Only - pre (18 participants, 22 transitions)

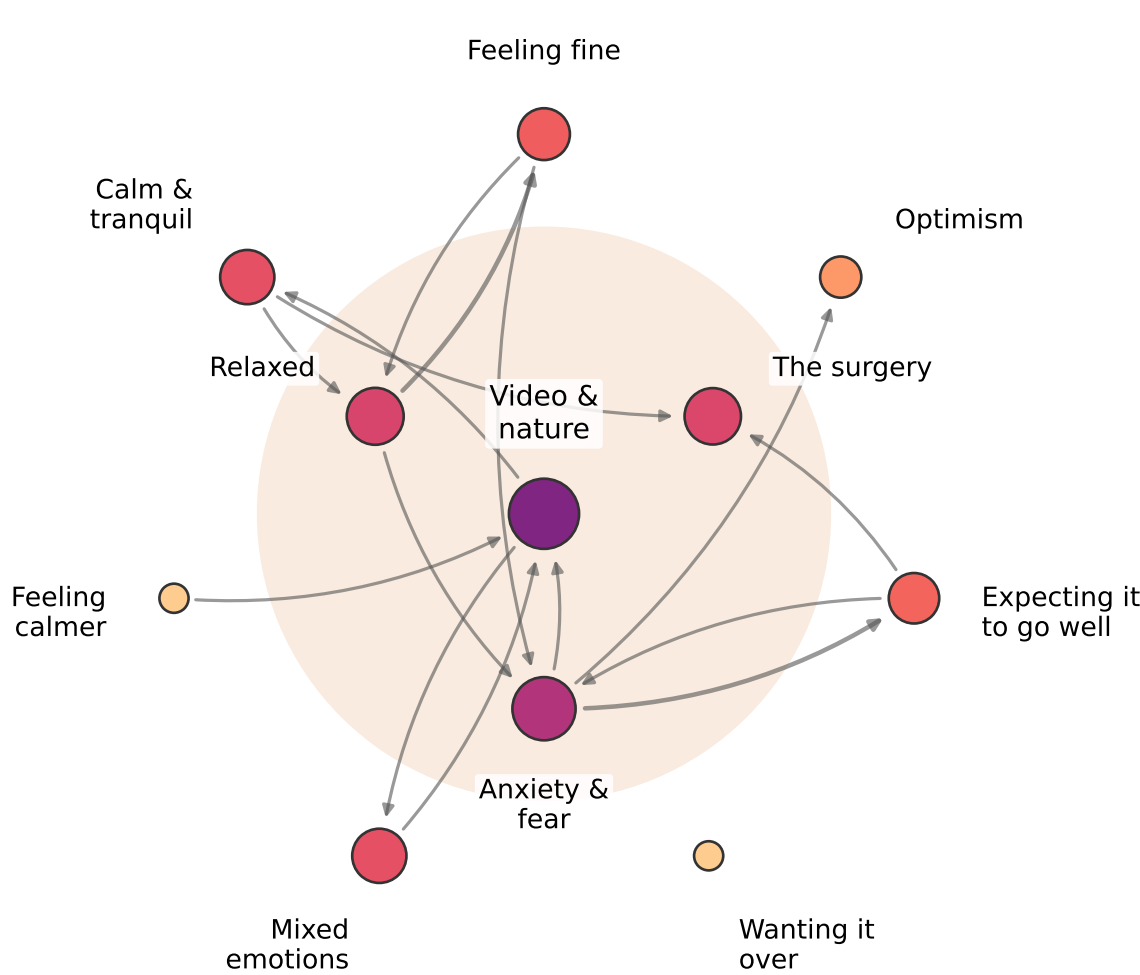

Control - pre (16 participants, 20 transitions)

VR Art - post (17 participants, 20 transitions)

VR Only - post (17 participants, 17 transitions)

Control - post (16 participants, 16 transitions)
